TRISHAD PHOGOLE

Data Engineer | Data Scientist

Johannesburg, South Africa | +27 67 633 2024 | www.phogolettrishad7@gmail.com

LinkedIn | **Portfolio** | **GitHub**

PROFESSIONAL SUMMARY

Curious and detail-oriented data professional with over one year of hands-on experience across data engineering, data science, machine learning and business intelligence. Proven track record of building scalable data pipelines, data marts and KPI dashboards, deploying machine learning models, and delivering data-driven insights that improve operational efficiency in the fintech and mining sectors. Passionate about leveraging advanced technologies to optimize operations, and drive innovation. Fueled by curiosity and commitment to continuous learning and emerging technologies.

CORE SKILLS

Programming: Python, SQL, PySpark, SAS

Data Engineering: Apache Airflow, Microsoft Fabric, Databricks, ETL, Data Pipelines, Data Marts, Microsoft Power Automate, Azure DevOps, WinSCP, Git, GitHub, Ubuntu Server (Linux)

Databases & Data Management: PostgreSQL, Microsoft SQL Server, SSMS, SSIS, SSAS, SSRS, BigQuery, DBeaver

Cloud & Business Intelligence: Microsoft Azure, Google Cloud Platform (GCP), AWS, Microsoft Power BI, Looker Studio, Microsoft Visio, Microsoft List

Machine Learning & AI: Scikit-learn, TensorFlow, PyTorch, NumPy, Matplotlib, Seaborn, Classification, Regression, Clustering, Deep Learning, Feature Engineering, Hyperparameter Tuning, A/B Testing, Hypothesis Testing, Predictive Modeling, Time Series Analysis, Model development, training & deployment Generative AI, NLP, LLMs, RAG, Microsoft 365 Copilot, Copilot Studio

WORK EXPERIENCE

Data Engineer | MoMo from MTN (MTN Group Fintech) Dec 2025 - Present

- Build and maintain data pipelines and automation workflows enabling seamless data ingestion from cloud platforms into the Microsoft Fabric environment for analysis and reporting, reducing manual data processing by 100%.
- Architect and build data marts tailored to business requirements, improving query performance by 99% while delivering a single source of truth for key MoMo services and application performance metrics.
- Design and maintain interactive KPI dashboards for MoMo services and applications, translating operational data into actionable insights for technical and non-technical stakeholders.
- Automate the synchronization of 100+ files daily from a remote SFTP server to a staging area using Batch scripting and WinSCP, improving data pipeline efficiency by 100%.
- Build Power Automate workflows to automate data movement, generate failure alerts and notify stakeholders, improving incident response times, operational efficiency and data availability by 95%.
- Facilitated training for multiple OpCos on the data quality dashboard and validation rules, driving consistent data interpretation, troubleshooting and governance.
- Implement and enhance data quality checks, validation frameworks, monitoring and alerting to ensure data accuracy, completeness, timeliness and reliability above 95% while enabling proactive issue detection.
- Log, monitor and escalate data incidents and missing-data issues, coordinating with data vendors to ensure 99% timely resolution and minimize reporting disruptions.
- Manage reprocessing of late-arriving and missing data files, ensuring 99% data availability and minimizing disruption to downstream reporting.
- Documented and maintained User Acceptance Testing (UAT) processes, Source-to-Target Mapping (STTM) specifications and data dictionaries, improving data consistency, transparency and governance by 90%.

Data Scientist | Mintek Mar 2025 - Nov 2025

- Developed and deployed machine learning models to optimize organizational operations, achieving up to 20% improvement through A/B testing, feature engineering and model optimization.
- Designed and maintained interactive KPI dashboards covering research outputs, HR metrics and divisional performance, reducing manual reporting time by 40%.
- Built and optimized ETL pipelines integrating data from multiple sources, including Azure Cloud, SharePoint, SQL databases and Excel, improving data consistency and reliability by 95%.
- Extracted, transformed and analyzed large-scale datasets using SQL, optimizing query performance while maintaining 99% data accuracy.
- Performed exploratory data analysis and statistical analysis to uncover actionable insights, supporting strategic decision-making and contributing to a 15% improvement in operational efficiency.
- Collaborated cross-functionally with team members to deliver data-driven recommendations, resulting in a 40% increase in operational efficiency.

EDUCATION

Bachelor of Science Honours in Computer Science, University of Limpopo Feb 2024 - Dec 2024

Bachelor of Science in Computer Science and Statistics, University of Limpopo Feb 2020 - Dec 2023

Matric, Kgagatlou Secondary School Jan 2015 - Dec 2019

CERTIFICATIONS & TRAINING

Coursera: IBM Data Analyst Professional Certificate; IBM Data Science Professional Certificate; IBM Data Engineering Professional Certificate; IBM Machine Learning Professional Certificate; IBM Generative AI Engineering Professional Certificate; IBM AI Engineering Professional Certificate; AWS Cloud Practitioner Essentials

Udemy: Credit Risk Modelling & Credit Scoring Using ML; Microsoft Power BI: Beginner to Advanced; Complete Databricks & PySpark Bootcamp; Azure Data Engineering End-to-End; Databricks Certified Data Engineer Associate - Bootcamp

SAS: SAS Programming Essentials

EDUQE: Fintech AI Agent Builder - Microsoft 365 Copilot & Copilot Studio
