PROFESSIONAL SUMMARY

I am a curious and detail-oriented data professional with applied hands-on experience across data science, machine learning, data engineering and business intelligence. Proven track record of building scalable data pipelines, deploying machine learning models, and delivering data-driven insights that improve operational efficiency within the fintech and mining space. Passionate about leveraging advanced technologies to optimise operations, and drive innovation. Recognised for improving operational efficiency and enabling performance growth through data-driven recommendations. Fuelled by curiosity and a commitment to continuous learning, I stay at the forefront of emerging technologies to build solutions that matter.

CORE SKILLS

Programming: Python, SQL, PySpark, SAS

Data Engineering: Apache Airflow, Microsoft Fabric, Databricks, Microsoft Power Automate, Azure DevOps, WinSCP, Github, Git, Ubuntu Server (Linux)

Databases & Data Management: PostgreSQL, Microsoft SQL Server, SSMS, SSIS, SSAS, SSRS, BigQuery, DBeaver

Cloud & Business Intelligence: Microsoft Azure, Google Cloud Platform (GCP), AWS, Microsoft Power BI, Looker Studio, Microsoft Visio

Data Science & Artificial Intelligence: Scikit-learn, TensorFlow, PyTorch, NumPy, Matplotlib, Seaborn, Classification, Regression, Clustering, Deep Learning, Feature Engineering, Hyperparameter tuning, A/B Testing, Hypothesis Testing, GenAI, NLP, LLMs, RAG, Microsoft 365 Copilot, Copilot Studio

WORK EXPERIENCE

Data Engineer | MoMo from MTN (MTN Group Fintech)

Dec 2025 - Present

- Build and maintain data pipelines and automation workflows enabling seamless data ingestion from cloud platforms into fabric environment for analysis and reporting, reducing manual data processing by 100%.
- Architect and build data marts tailored to business requirements, improving query performance by 99% while delivering a single source of truth for key MoMo services and applications performance metrics.
- Design and maintain interactive KPI dashboards for MoMo services and applications, translating operational data into actionable insights for both technical and non-technical stakeholders.
- Automate the synchronization of 100+ files daily from a remote SFTP server to staging area using Batch scripting and WinSCP, improving data pipeline efficiency by 100%.
- Build Power Automate workflows to automate data movement, generate failure alerts, and notify stakeholders, improving incident response times, operational efficiency and data availability by 95%.
- Facilitated training for multiple OpCos on data quality dashboard and validation rules, driving consistent data interpretation, troubleshooting, and governance across the OpCos.
- Implement and enhance data quality checks, validation frameworks, monitoring, and alerting to ensure data accuracy, completeness, timeliness, and reliability by over 95% while enabling proactive issue detection.
- Log, monitor, and escalate data incidents and missing-data issues, coordinating with vendors responsible for data delivery to ensure 99% timely resolution and minimize reporting disruptions.
- Manage the reprocessing of late-arriving and missing data files, ensuring 99% data availability and minimizing disruptions to downstream reporting processes.
- Documented and maintained UAT (User Acceptance Testing) processes, Source-to-Target Mapping (STTM) specifications and data dictionaries, improving data consistency, transparency, and governance by 90%.
- Collaborate cross-functionally with team members to deliver data-driven recommendations, resulting in a 40% increase in operational efficiency.

Data Scientist | Mintek

Mar 2025 - Nov 2025

- Developed and deployed machine learning models to optimize organizational operations, achieving up to 20% improvement through A/B testing, feature engineering, and model optimization.
- Designed and maintained interactive KPI dashboards, covering research outputs, HR metrics, divisional performance, and other key areas to support performance monitoring, reducing manual reporting time by 40%.
- Built and optimized ETL pipelines to integrate data from multiple sources, including Azure Cloud, SharePoint, SQL databases, and Excel, improving data consistency and reliability by 95%.
- Extracted, transformed, and analyzed large-scale datasets using SQL, optimizing query performance while maintaining 99% data accuracy.
- Performed exploratory data analysis and statistical analysis to uncover actionable insights, supporting strategic decision-making and contributing to a 15% improvement in operational efficiency.
- Collaborated cross-functionally with team members to deliver data-driven recommendations, resulting in a 40% increase in operational efficiency.

EDUCATION

Bachelor of Science Honours in Computer Science University of Limpopo	Feb 2024 - Dec 2024
Bachelor of Science in Computer Science and Statistics University of Limpopo	Feb 2020 - Dec 2023
Matric Kgagatlou Secondary School	Jan 2015 - Dec 2019

CERTIFICATIONS & TRAINING

Coursera : IBM Data Analyst Professional Certificate; IBM Data Science Professional Certificate; IBM Data Engineering Professional Certificate; IBM Machine Learning Professional Certificate; IBM Generative AI Engineering Professional Certificate; IBM AI Engineering Professional Certificate; AWS Cloud Pratictioner Essentials

Udemy : IFRS 9 ECL Model Development & Validation; Credit Risk Modelling & Credit Scoring Using ML; Basel Accords (II, III, V): Risk Management & Banking Regulations; Microsoft Power BI: Beginner to Advanced; Complete Databricks & PySpark Bootcamp; Azure Data Engineering End-to-End

SAS : SAS Programming Essentials

Corporate Training: Work Readiness Programme; AI Agent Builder - Copilot, Copilot Studio & Cowork
