PROFESSIONAL SUMMARY

Curious and detail-oriented Data Scientist and Data Engineer with over one year of hands-on experience across data science, machine learning, data engineering and business intelligence. Proven track record of building scalable data pipelines, deploying machine learning models, and delivering data-driven insights that improve operational efficiency within fintech and mining industries. Passionate about leveraging advanced technologies to optimise operations, and drive innovation. Recognised for improving operational efficiency and enabling performance growth through data-driven recommendations. Fuelled by curiosity and a commitment to continuous learning, I stay at the forefront of emerging technologies to build solutions that matter.

TECHNOLOGIES & TECHNICAL SKILLS

Programming Languages	Databases & Data management	Cloud & BI tools
- Python - SAS	- DBeaver - SQL (MySQL, PostgreSQL, SSMS) - BigQuery (SQL Analytics)	- GCP, AWS, Azure, Alibaba Cloud Services - Microsoft Power BI, Looker Studio - Google Analytics
Big Data & Data Engineering - Apache Spark (PySpark) - Data Integration & Orchestration - Technical Documentation & Reproducibility - Stakeholder Engagement & Management - ETL & Data Pipelines (Apache Airflow, Microsoft Fabric, Power Automate) - Azure DevOps, Linux, WinSCP - Version Control (Git, Github)	Data Science & Machine Learning/AI - Libraries & Frameworks (Pandas, Numpy, Matplotlib, PyTorch, Scikit-learn, Tensorflow) - Classification, Regression, Clustering, Deep Learning, Computer Vision - Predictive Modeling & Time Series Analysis - Model Development & Training - Experimental Design (A/B Testing, Hypothesis Testing) - Artificial Intelligence (NLP, LLMs, Transformers)	

WORK EXPERIENCE

Data Engineer

MoMo from MTN (MTN Group Fintech) | December 2025 - Present

- Build and maintain data pipelines and automation workflows enabling seamless data ingestion from cloud platforms into fabric environment for analysis and reporting, reducing manual data processing by 100%.
- Architect and build data marts tailored to business requirements, improving query performance by 99% while delivering a single source of truth for key MoMo services and applications performance metrics.
- Design and maintain interactive KPI dashboards for MoMo services and applications, implementing data quality checks and validation rules, improving data reliability by 99%.
- Automate SFTP file transfers using batch scripting and WinSCP, enabling reliable and auditable ingestion of 100+ files daily into the Microsoft Fabric environment while improving data pipeline efficiency by 100%.
- Query and consolidate data across the OpCo database using DBeaver as a database client, enabling efficient extraction and reporting of millions of transaction records for business stakeholders.
- Facilitate training for multiple OpCos on data quality dashboard and validation rules, driving consistent data interpretation, troubleshooting, and governance across the OpCos.
- Log, monitor, and escalate data incidents and missing-data issues, coordinating with vendors responsible for data delivery to ensure 99% timely resolution and minimize reporting disruptions.
- Managed the reprocessing of late-arriving and missing data files, ensuring 99% data availability and minimizing disruptions to downstream reporting processes
- Document and maintain User Acceptance Testing (UAT) processes, Source-to-Target Mapping (STTM) specifications and data dictionaries, improving data consistency, transparency, and ease of system maintenance by 90%.
- Collaborate cross-functionally with team members to deliver data-driven recommendations, resulting in a 40% increase in operational efficiency.

Data Scientist

Mintek | March 2025 - November 2025

- Developed and deployed machine learning models to optimize organizational operations, achieving up to 20% improvement through A/B testing and algorithm fine-tuning.
- Designed and maintained interactive KPI dashboards, covering research outputs, HR metrics, divisional performance, and other key areas to support performance monitoring, reducing manual reporting time by 40%.
- Executed ETL processes to integrate data from diverse sources (SharePoint, databases, Excel), improving data consistency by 95%.
- Leveraged SQL to extract, transform, and analyze large datasets, optimizing query performance and ensuring 99% data accuracy.
- Translated complex data into impactful business insights, contributing to a 15% improvement in operational efficiency and enhanced strategic planning outcomes.

EDUCATION

Bachelor of Science Honours in Computer Science

University of Limpopo | February 2024 - December 2024

Bachelor of Science in Computer Science and Statistics

University of Limpopo | February 2020 - December 2023

Matric

Kgagatlou Secondary School | January 2015 - December 2019

CERTIFICATIONS

COURSERA

- IBM Data Analyst Professional Certificate
- IBM Data Science Professional Certificate
- IBM Data Engineering Professional Certificate
- IBM Machine Learning Professional Certificate
- IBM Generative AI Engineering Professional Certificate
- IBM AI Engineering Professional Certificate
- AWS Cloud Practioner Essentials

UDEMY

- IFRS 9 ECL Model Development & Validation
- Credit Risk Modelling & Credit Scoring Using ML
- Basel Accords (II, III, V): Risk Management & Banking Regulations
- Microsoft Power BI: Beginner to Advanced
- Complete Databricks & PySpark Bootcamp
- Azure Data Engineering End-to-End

SAS

- SAS Programming Essentials

PROFESSIONAL DEVELOPMENT

- Corporate Work Readiness Programme
