PROFESSIONAL SUMMARY

Curious and detail-oriented Data Scientist and Data Engineer with over one year of hands-on experience across data science, machine learning, data engineering and business intelligence. Proven track record of building scalable data pipelines, deploying machine learning models, and delivering data-driven insights that improve operational efficiency within fintech and mining industries. Passionate about leveraging advanced technologies to optimise operations, and drive innovation. Recognised for improving operational efficiency and enabling performance growth through data-driven recommendations. Fuelled by curiosity and a commitment to continuous learning, I stay at the forefront of emerging technologies to build solutions that matter.

TECHNOLOGIES & TECHNICAL SKILLS

Programming Languages - Python - SAS	Databases & Data management - DBeaver - SQL (MySQL, PostgreSQL, SSMS) - BigQuery (SQL Analytics)	Cloud & BI tools - GCP, Azure Cloud Services - Microsoft Power BI, Looker Studio - Google Analytics
Big Data & Data Engineering - Apache Spark (PySpark) - Data Integration & Orchestration - Technical Documentation & Reproducibility - ETL & Data Pipelines (Apache Airflow) - Microsoft Fabric, Power Automate, Databricks - Azure DevOps, Linux, WinSCP - Batch Scripting (Windows CMD) - Version Control (Git, Github)	Data Science & Machine Learning/AI - Libraries & Frameworks (Pandas, Numpy, Matplotlib, PyTorch, Scikit-learn, Tensorflow) - Classification, Regression, Clustering, Deep Learning, Computer Vision - Predictive Modeling & Time Series Analysis - Model Development & Training - Experimental Design (A/B Testing, Hypothesis Testing) - Artificial Intelligence (NLP, LLMs, Transformers)	

WORK EXPERIENCE

Data Engineer

MoMo from MTN (MTN Group Fintech) | December 2025 - Present

- Build and maintain data pipelines and automation workflows enabling seamless data ingestion from cloud platforms into fabric environment for analysis and reporting, reducing manual data processing by 100%.
- Architect and build data marts tailored to business requirements, improving query performance while delivering a single source of truth for key MoMo performance metrics.
- Design and maintain interactive KPI dashboards for MoMo services, implementing data quality checks and validation rules improving data reliability by 95%.
- Automate secure SFTP file transfers using WinSCP, enabling reliable and auditable ingestion of 100+ files daily into the Microsoft Fabric environment while improving data pipeline efficiency by 100%.
- Query and consolidate data across different OpCos databases using DBeaver as a database client, supporting efficient data extraction and reporting.
- Document and maintain User Acceptance Testing (UAT) processes, Source-to-Target Mapping (STTM) specifications, data dictionaries and data models, improving data consistency, transparency, and ease of system maintenance.
- Delivered training to multiple MTN OpCos on data quality dashboard logic, and validation rules, enabling consistent interpretation, troubleshooting, and governance across the OpCos.
- Log, monitor, and escalate data incidents and missing-data issues, coordinating with vendors responsible for data delivery to ensure timely resolution and minimize reporting disruptions.
- Collaborate cross-functionally with team members to deliver data-driven recommendations, resulting in a 40% increase in operational efficiency.

Data Scientist

Mintek | March 2025 - November 2025

- Developed and deployed machine learning models to optimize organizational operations, achieving up to 20% improvement through A/B testing and algorithm fine-tuning.
- Designed and maintained interactive KPI dashboards, covering research outputs, HR metrics, divisional performance, and other key areas to support performance monitoring, reducing manual reporting time by 40%.
- Executed ETL processes to integrate data from diverse sources (SharePoint, databases, Excel), improving data consistency by 95%.
- Leveraged SQL to extract, transform, and analyze large datasets, optimizing query performance and ensuring 99% data accuracy.
- Translated complex data into impactful business insights, contributing to a 15% improvement in operational efficiency and enhanced strategic planning outcomes.
- Collaborated with cross-functional teams to deliver data-driven recommendations, resulting in a 40% increase in overall operational performance.

EDUCATION

Bachelor of Science Honours in Computer Science

University of Limpopo | February 2024 - December 2024

Bachelor of Science in Computer Science and Statistics

University of Limpopo | February 2020 - December 2023

Matric

Kgagatlou Secondary School | January 2015 - December 2019

CERTIFICATIONS

IBM Professional Certificates

- Data Analyst Professional Certificate
- Data Science Professional Certificate
- Data Engineering Professional Certificate
- Machine Learning Professional Certificate
- AWS Cloud Practioner Essentials

SAS Certificate

- SAS Programming Essentials

Udemy Certificates

- IFRS 9 ECL Model Development & Validation
- Credit Risk Modelling & Credit Scoring Using ML
- Basel Accords (II, III, V): Risk Management & Banking Regulations
- Microsoft Power BI: Beginner to Advanced
- Complete Databricks & PySpark Bootcamp
- Azure Data Engineering End-to-End

Professional Development Certificate

- Corporate Work Readiness Programme
